Indigenous Land Corporation					
Indigenous Land Corporation	The ILC is a statutory authority set up under the Aboriginal and Torres Strait Islander Commission Act by the Commonwealth Government to assist Indigenous People to acquire and manage land in a sustainable way, so as to provide environmental, economic, social and/or cultural benefits.	The ILC receives funding from the Aboriginal and Torres Strait Islander Land Fund.	N/A	The ILC land acquisition and land management programs are application based.	The ILC, in partnership with the Ngarda-Ngarli-Yarndu Council and the Yamatji Land and Sea Council/Pilbara Native Title Service undertook a regional planning process which identified regional issues and land needs of Indigenous groups in the Pilbara region (referred to as the PSROLN). One recommendation from this report is the development of further partnerships with the relevant regional agencies and stakeholders to implement a Pilbara Land Strategy.
Land Acquisition	<p>The ILC acquires land based on traditional, historical and/or contemporary links to land. The ILC will acquire land for the purpose of assisting Indigenous people to derive cultural, social, economic or environmental benefits.</p> <p>The PSROLN identifies the acquisition of town blocks and businesses as a need in the Port Hedland region.</p>	N/A	N/A	Applicants must apply under cultural, social, environmental, or economic program and must include a Property Management Plan or Business Plan .	<p>To date the ILC has not purchased any land in the Pilbara region. Applications for land acquisition assistance in the region are minimal.</p> <p>The application process requires applicants to demonstrate upfront their capacity to develop their application and the sustainability of their proposed land-use. The application must also show what benefits will be obtained by the land purchase.</p> <p>The ILC is working with other agencies to provide support to applicants in developing their business plans or property management plans.</p>
Land Management	The ILC objective is to assist Indigenous people to manage their land in order to derive cultural, environmental, economic or social benefits from it by building a capacity for self-reliance, and by supporting enterprises that deliver sustainable outcomes.	N/A	N/A	Applicants must apply under cultural, social, environmental, or economic program and must include a Property Management Plan or Business Plan .	<p>To date, requests for ILC land management assistance in the region have been minimal.</p> <p>Adding value to existing Indigenous-held land in the region was identified as an issue in the PSROLN. The ILC is keen to work with regional agencies to develop a coordinated approach to addressing these issues.</p>

<b>Dept of Agriculture</b>
